

Tzu-Yao Chiu

Tel: +1 (614) 374 8356

Email: chiu.315@osu.edu

EDUCATION

The Ohio State University (OSU), US (Aug 2022 – Present)

Degree: Doctor of Philosophy

Major: Psychology

Advisor(s): Julie D. Golomb

University of Southampton (UoS), UK (Sep 2021 – Jun 2022)

Degree: Masters of Science

Major : Psychology

Advisor(s): Denis Drieghe and Erich Graf

National Chengchi University (NCCU), Taiwan (Sep 2016 – Jun 2020)

Degree: Bachelor of Science

Major : Psychology

Advisor(s): Jie-Li Tsai

RESEARCH INTERESTS

- Perceptual stability across saccades
- Interactions between eye movements and perception, attention, memory
- Eye-movement control during reading

PUBLICATIONS

1. **Chiu, T.-Y.** & Golomb, J. D. (2026). Top-down motivation both decreases and increases feature interference following a saccade. *Psychonic Bulletin & Review* 33, 142. <https://doi.org/10.3758/s13423-026-02907-6>
2. **Chiu, T.-Y.**, Jaen, I., & Golomb, J. D. (2025). Spatiotemporal predictability of saccades modulates postsaccadic feature interference. *Journal of vision*, 25(14), 1. <https://doi.org/10.1167/jov.25.14.1>
3. Choi, Y. M., **Chiu, T.-Y.**, Ferreira, J., & Golomb, J. D. (2025). Maintaining visual stability in naturalistic scenes: The roles of trans-saccadic memory and default assumptions. *Cognition*, 262, 106165. <https://doi.org/10.1016/j.cognition.2025.106165>
4. **Chiu, T.-Y.** & Golomb, J. D. (2025). The influence of saccade target status on the reference frame of object-location binding. *Journal of experimental psychology. General*, 154(5), 1183–1200. <https://doi.org/10.1037/xge0001718>
5. **Chiu, T.-Y.** & Drieghe, D. (2023) The role of visual crowding in eye movements during reading: Effects of text spacing. *Attention, Perception, Psychophysics* 85, 2834–2858. <https://doi.org/10.3758/s13414-023-02787-1>

PREPRINTS

1. Choi Y. M., **Chiu T.-Y.**, & Golomb J. D. (2025) Post-saccadic disruption of semantic category information in naturalistic scenes. <https://doi.org/10.1101/2025.06.06.658316>

MANUSCRIPTS IN PREPARATION

1. **Chiu T.-Y.**, Lu Z., & Golomb J. D. (in prep) Dynamic read-out of transsaccadic attentional remapping from EEG alpha band oscillations
2. Liu F., **Chiu T.-Y.**, Leber A. B., & Golomb J. D. (in prep) The influence of motivation on attentional capture and feature perception.
3. Savelson I., **Chiu T.-Y.**, Turner B. M., & Leber A. B. (in prep) An evidence accumulation and reinforcement learning model of distractor suppression.

CONFERENCE PRESENTATIONS (*indicates talk presentations)

1. **Chiu T.-Y.** & Golomb J. D. (2026, Upcoming) Top-down motivation both increases and decreases feature interference following a saccade. Vision Science Society Annual Meeting
2. Liu F., **Chiu T.-Y.**, Leber A. B., & Golomb J. D. (2026, Upcoming) The influence of motivation on attentional capture and feature perception. Vision Science Society Annual Meeting
3. Savelson I., **Chiu T.-Y.**, Turner B. M., & Leber A. B. (2026, Upcoming) An evidence accumulation and reinforcement learning model of distractor suppression. Vision Science Society Annual Meeting
4. **Chiu T.-Y.**, Lu Z., & Golomb J. D. (2025, Nov) Dynamic read-out of spatial remapping across saccades with time-resolved EEG alpha band decoding, Society of Neuroscience Annual Meeting
5. **Chiu T.-Y.**, Lu Z., & Golomb J. D. (2025, May) Dynamic read-out of trans-saccadic attentional remapping from alpha-band oscillation, Vision Science Society Annual Meeting
6. ***Chiu T.-Y.** & Golomb J. D. (2024, Nov) Top-down reward modulates feature interference following saccadic eye movements, Psychonomic Society 65th Annual Meeting
7. **Chiu T.-Y.** & Golomb J. D. (2024, May) The influence of saccade target status on the reference frame of object-location binding. Vision Science Society Annual Meeting
8. Choi Y. M., **Chiu T.-Y.**, & Golomb J. D. (2024, May). Behavioral and neural correlates of impaired scene perception following saccadic eye movements. Vision Science Society Annual Meeting
9. Ferreira J., Choi Y. M., **Chiu T.-Y.**, & Golomb J. D. (2024, May) The blanking effect on detecting changes in natural scenes across saccades, Vision Science Society Annual Meeting.
10. Jaen I. S., **Chiu T.-Y.**, & Golomb J. D. (2024, May) The influence of saccade predictably on post-saccadic feature binding, Vision Science Society Annual Meeting.
11. ***Chiu T.-Y.**, & Golomb J. D. (2023, Nov) Saccade target status influences the reference frame of object-location binding, Object, Perception, Attention, and Memory.
12. **Chiu T.-Y.**, & Golomb J. D. (2023, July) The influence of reward/motivation on post-saccadic updating of spatial attention, Gordon Research Conference on Eye Movements.

13. Choi Y. M., **Chiu T.-Y.**, & Golomb J. D. (2023, May). Post-saccadic impairment in scene perception, Vision Science Society Annual Meeting
14. ***Chiu, T.-Y.** & Drieghe D. (2022, Aug.). The role of visual crowding in eye movements during reading, The 21st European Conference on Eye Movements (ECEM).
15. **Chiu, T.-Y.** & Tsai, J.-L. (2020, Sep.). Parafoveal word processing affects saccade targeting in reading Chinese sentences, The 26th Architecture and Mechanisms for Language Processing Conference (AMLaP).

AWARDS AND HONORS

1. 2026 Herbert Toops Research Award (USD 2,000, OSU Dept of Psychology)
2. 2026 Summer Research Excellence Awards (USD 6,500, OSU CCBBI)
3. 2025 Trainee Professional Development Award (TPDA) (USD 1,000, Society for Neuroscience)
4. 2025 Summer Research Excellence Awards (USD 6,500, OSU Dept of Psychology)
5. 2022-2023 University Fellowship (USD 30,000, OSU)
6. 2020 Outstanding undergraduate research project (NCCU Dept of Psychology)

MENTORING

Fengyuan Liu (post-bac researcher at The Ohio State University)
Isabel Jaen (undergrad thesis student at The Ohio State University)
Jake Ferreira (undergrad thesis student at The Ohio State University)

PROGRAMMING AND EXPERIMENTAL SKILLS

Computer Languages: Python, MATLAB, R
Software & Toolboxes: EEGLAB, MNE, FSL, NeuroRA
Experimental Experience: EEG, fMRI, and Eye-tracking

AD-HOC REVIEWER

Visual Cognition, Attention, Perception, & Psychophysics
Journal of Psycholinguistic Research
